

Give a goal:
Assess tumor grade and
generate pathology report.

ACP (Autonomous Computational Pathology) Agentic System

Autonomously builds and runs the workflow

1. World knowledge reasoning

Understand pathology concepts, disease mechanisms, diagnostic criteria, and clinical guidelines .

Pathology textbooks

Clinical guidelines

Research literature

Expert consensus

2. Tool execution reasoning

Know what tools are available, what they can do, and how to configure and orchestrate them .

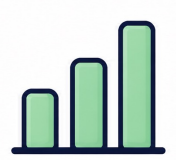

WSI reader

Patch extractor

Feature extractor

MIL classifier

Metrics calculator

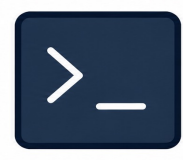

3. Operation reasoning

Know how to use tools, follow protocols, handle IO, and build executable workflows .

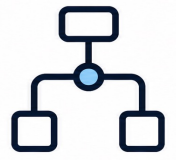

API docs

Command examples

I/O formats

Workflow templates
